

KEEP YOUR **PAD-MOUNT TRANSFORMER** CLEAR OF OBSTRUCTIONS

Transformers provide power to our homes and businesses. Blocking access to transformers may result in safety issues and can prevent timely restoration of service following a power outage.

Keep objects and plants away from the transformer

Plants, trees, bushes, benches, rocks, fences or any large objects can obstruct access to the transformer and prevent utility personnel from restoring power in a timely manner following a power outage.

Do not open the transformer

Opening a transformer can expose you to high voltage electricity, putting you at risk of injury or death. Only qualified electric utility personnel should open and work on a transformer.

Contact your utility for planting instructions

Keep all shrubs, plants or any form of landscaping at least 12 feet away from the transformer door or access panel and 3 feet away from the other sides. For questions or more instructions, please contact your local utility.
