

# ERNIE ENERGY

**and The Power of Public Power**

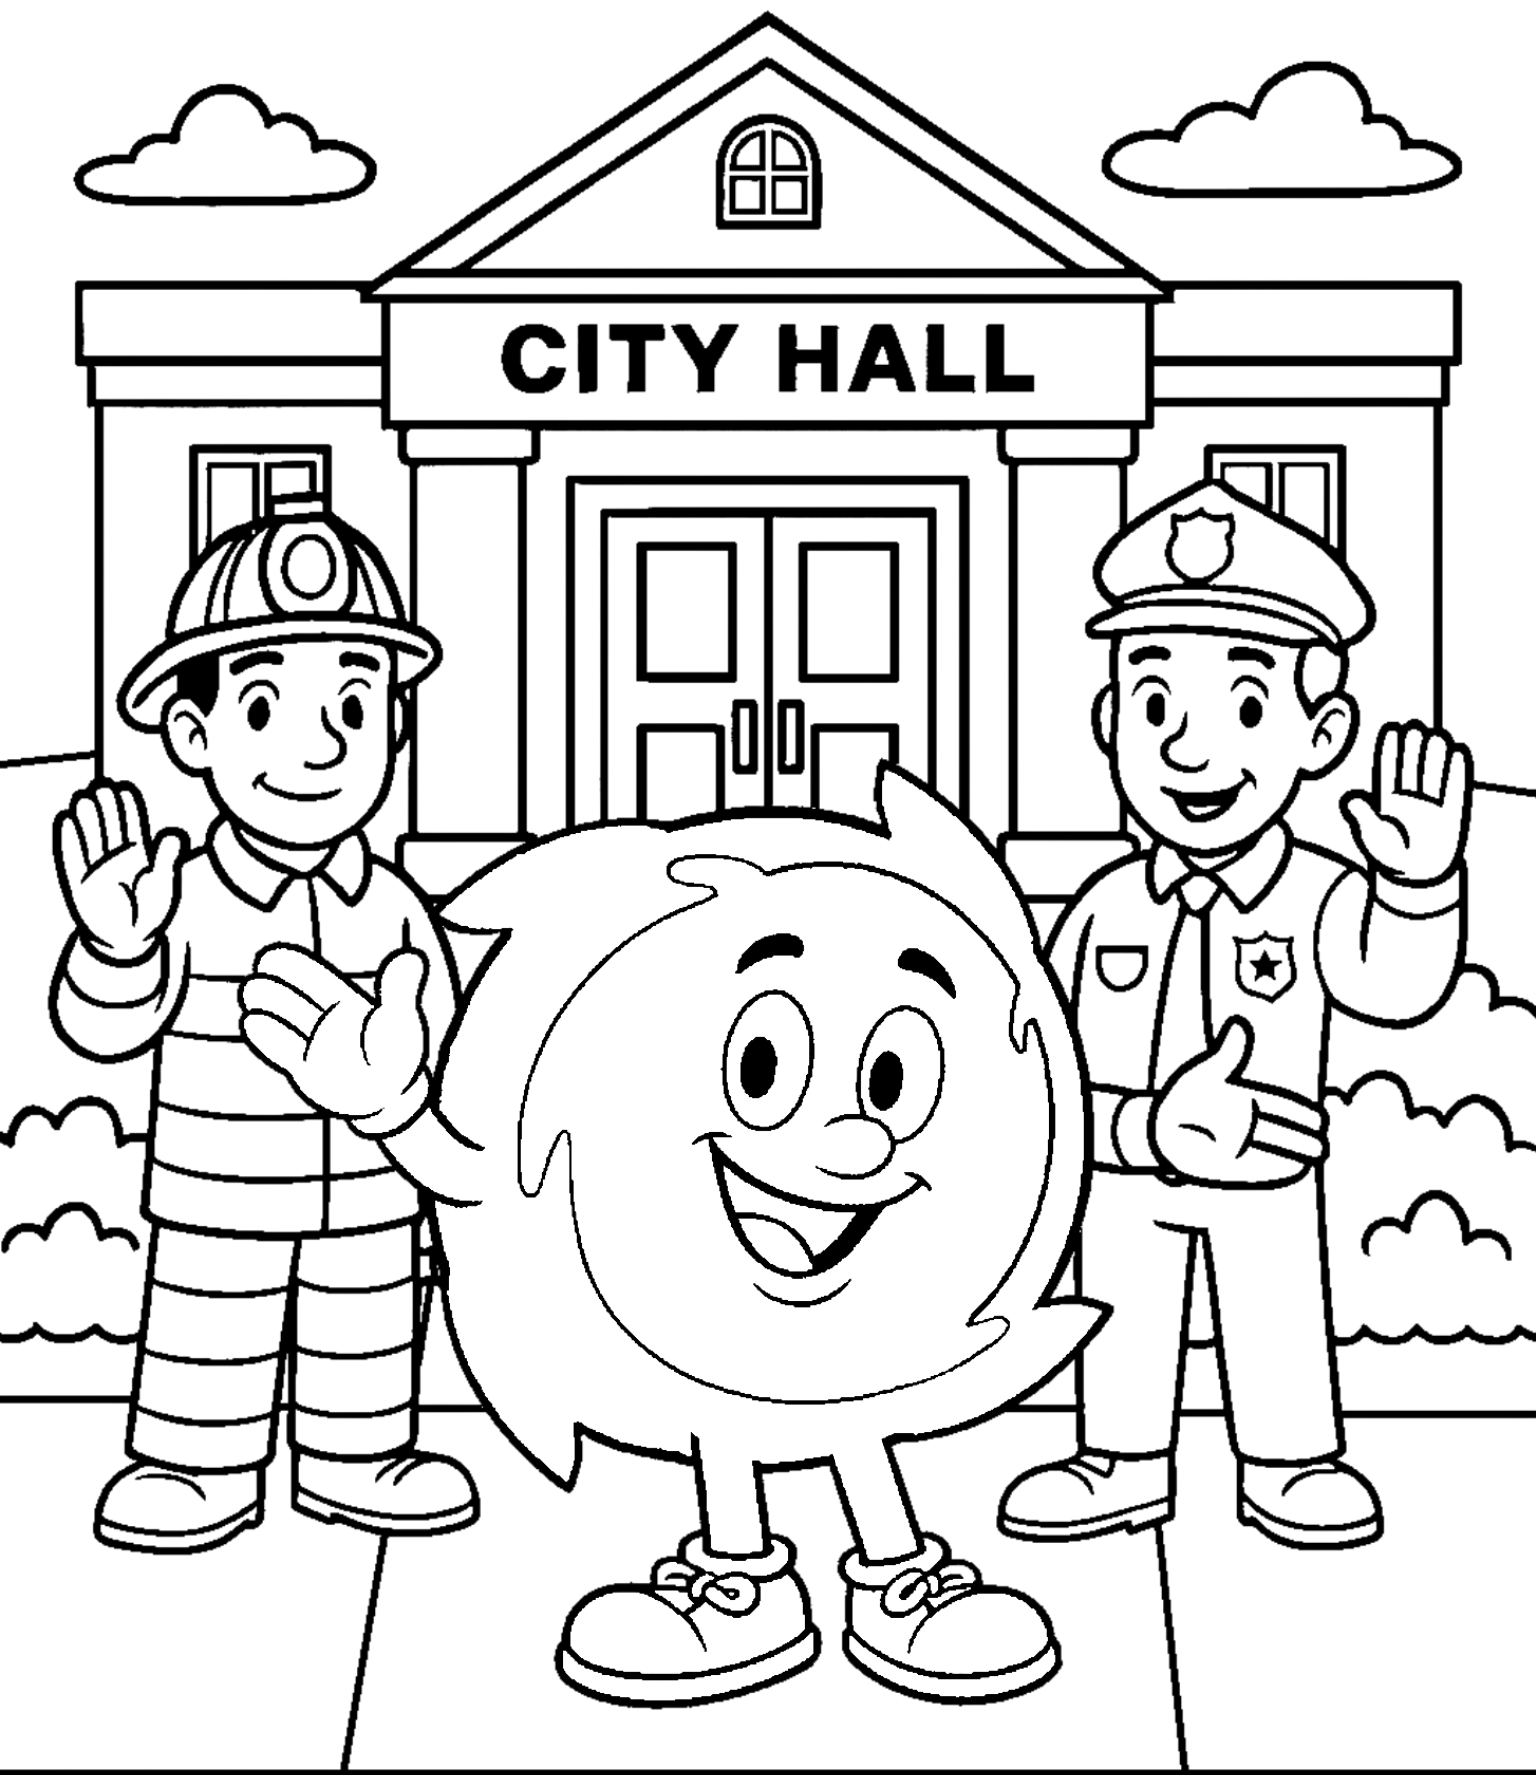

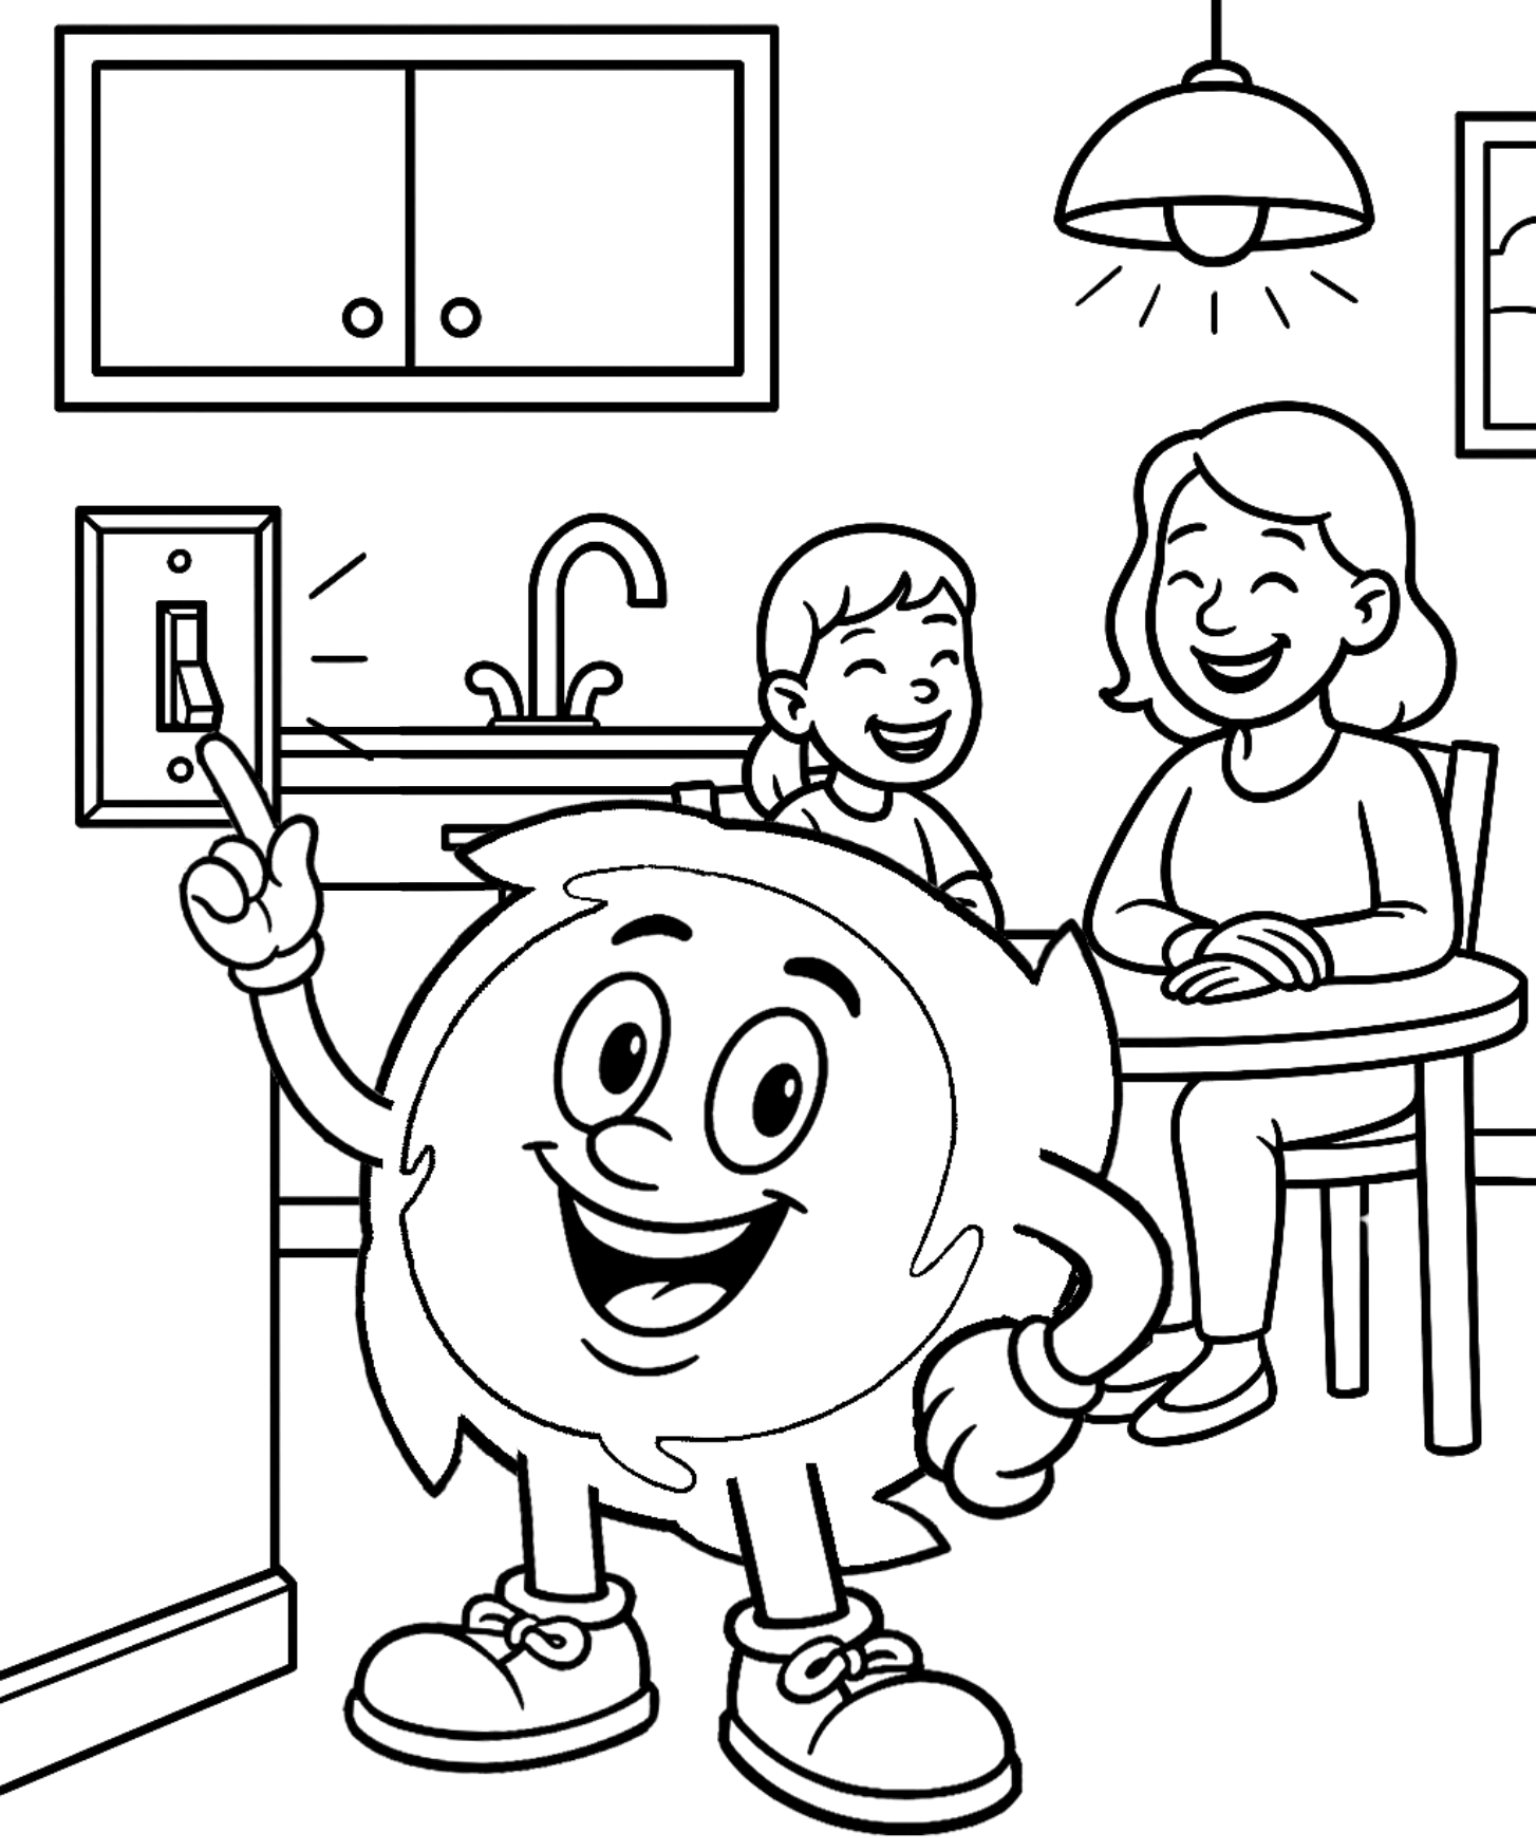

# Public Power!

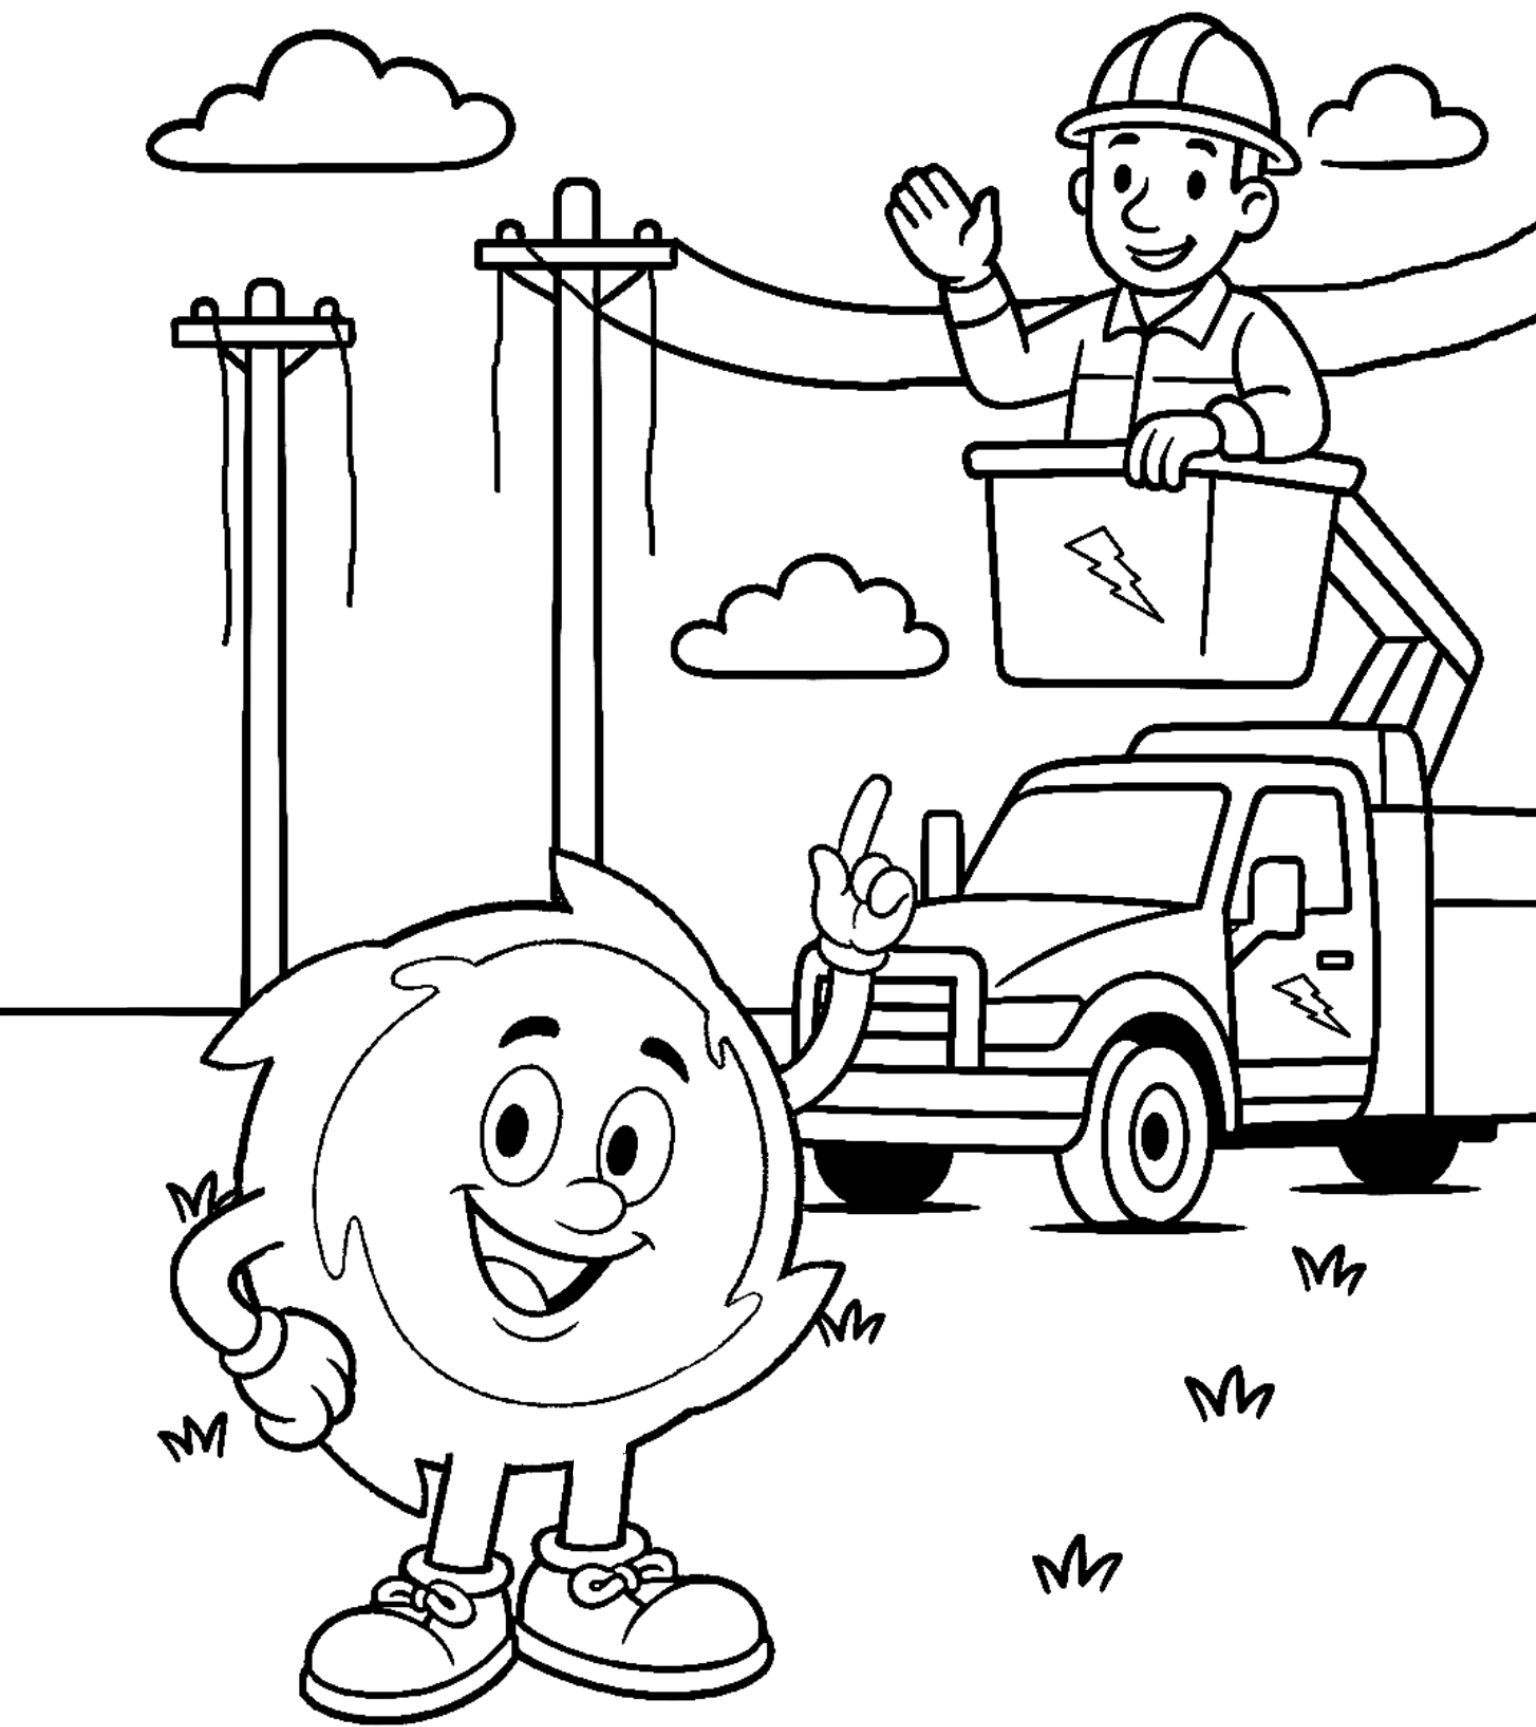

**I'm Ernie Energy! I'll show you how public power keeps our community strong.**

**Public power is part of our town, just like  
the fire and police departments.**

**We bring you safe, reliable electricity,  
whether you are at home or school!**

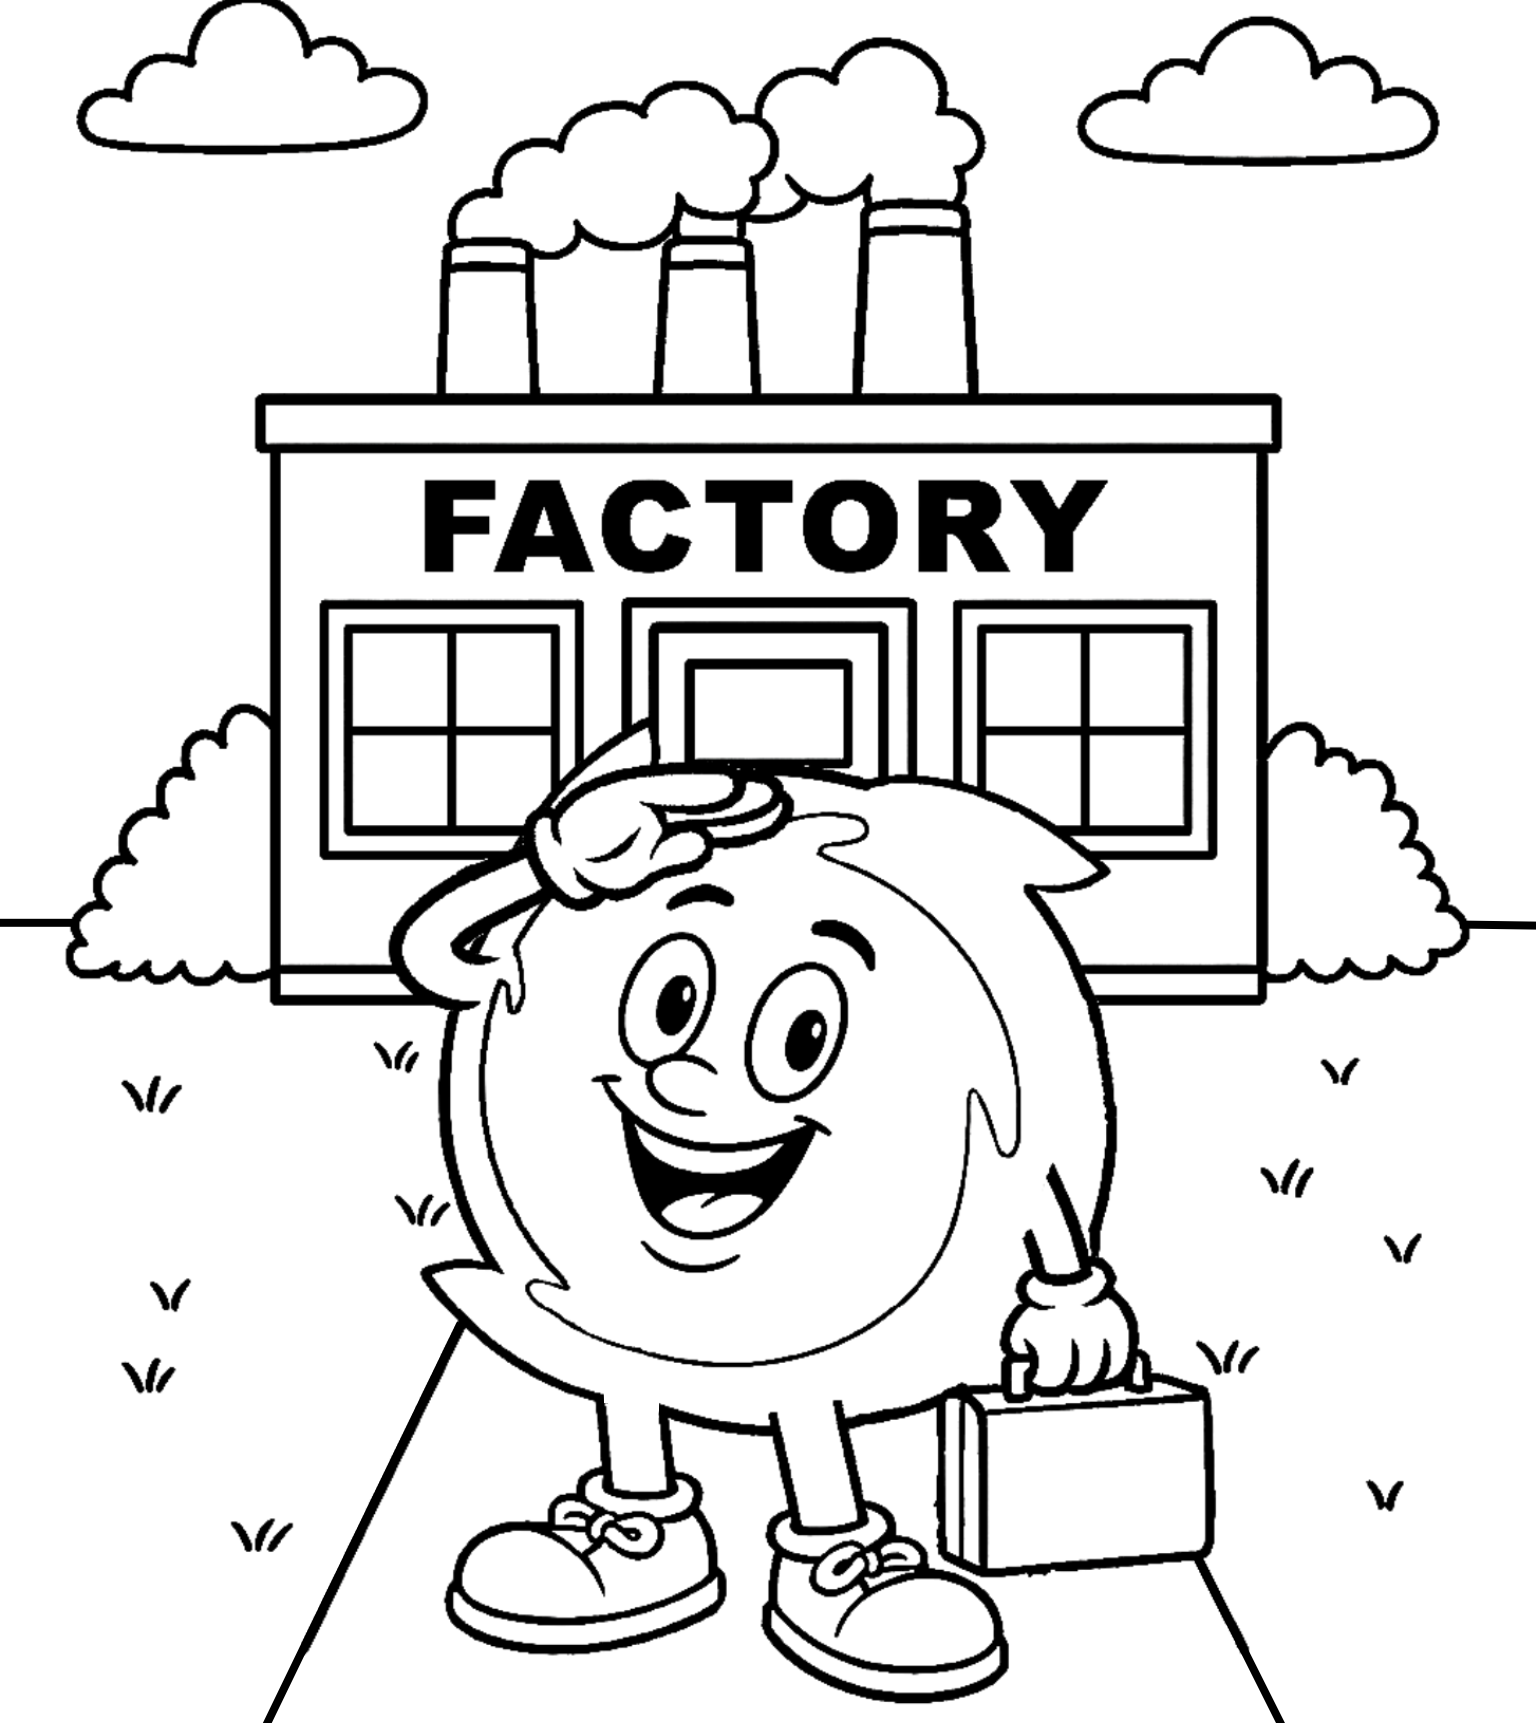

**When the lights go out,  
we work hard to turn them back on.**

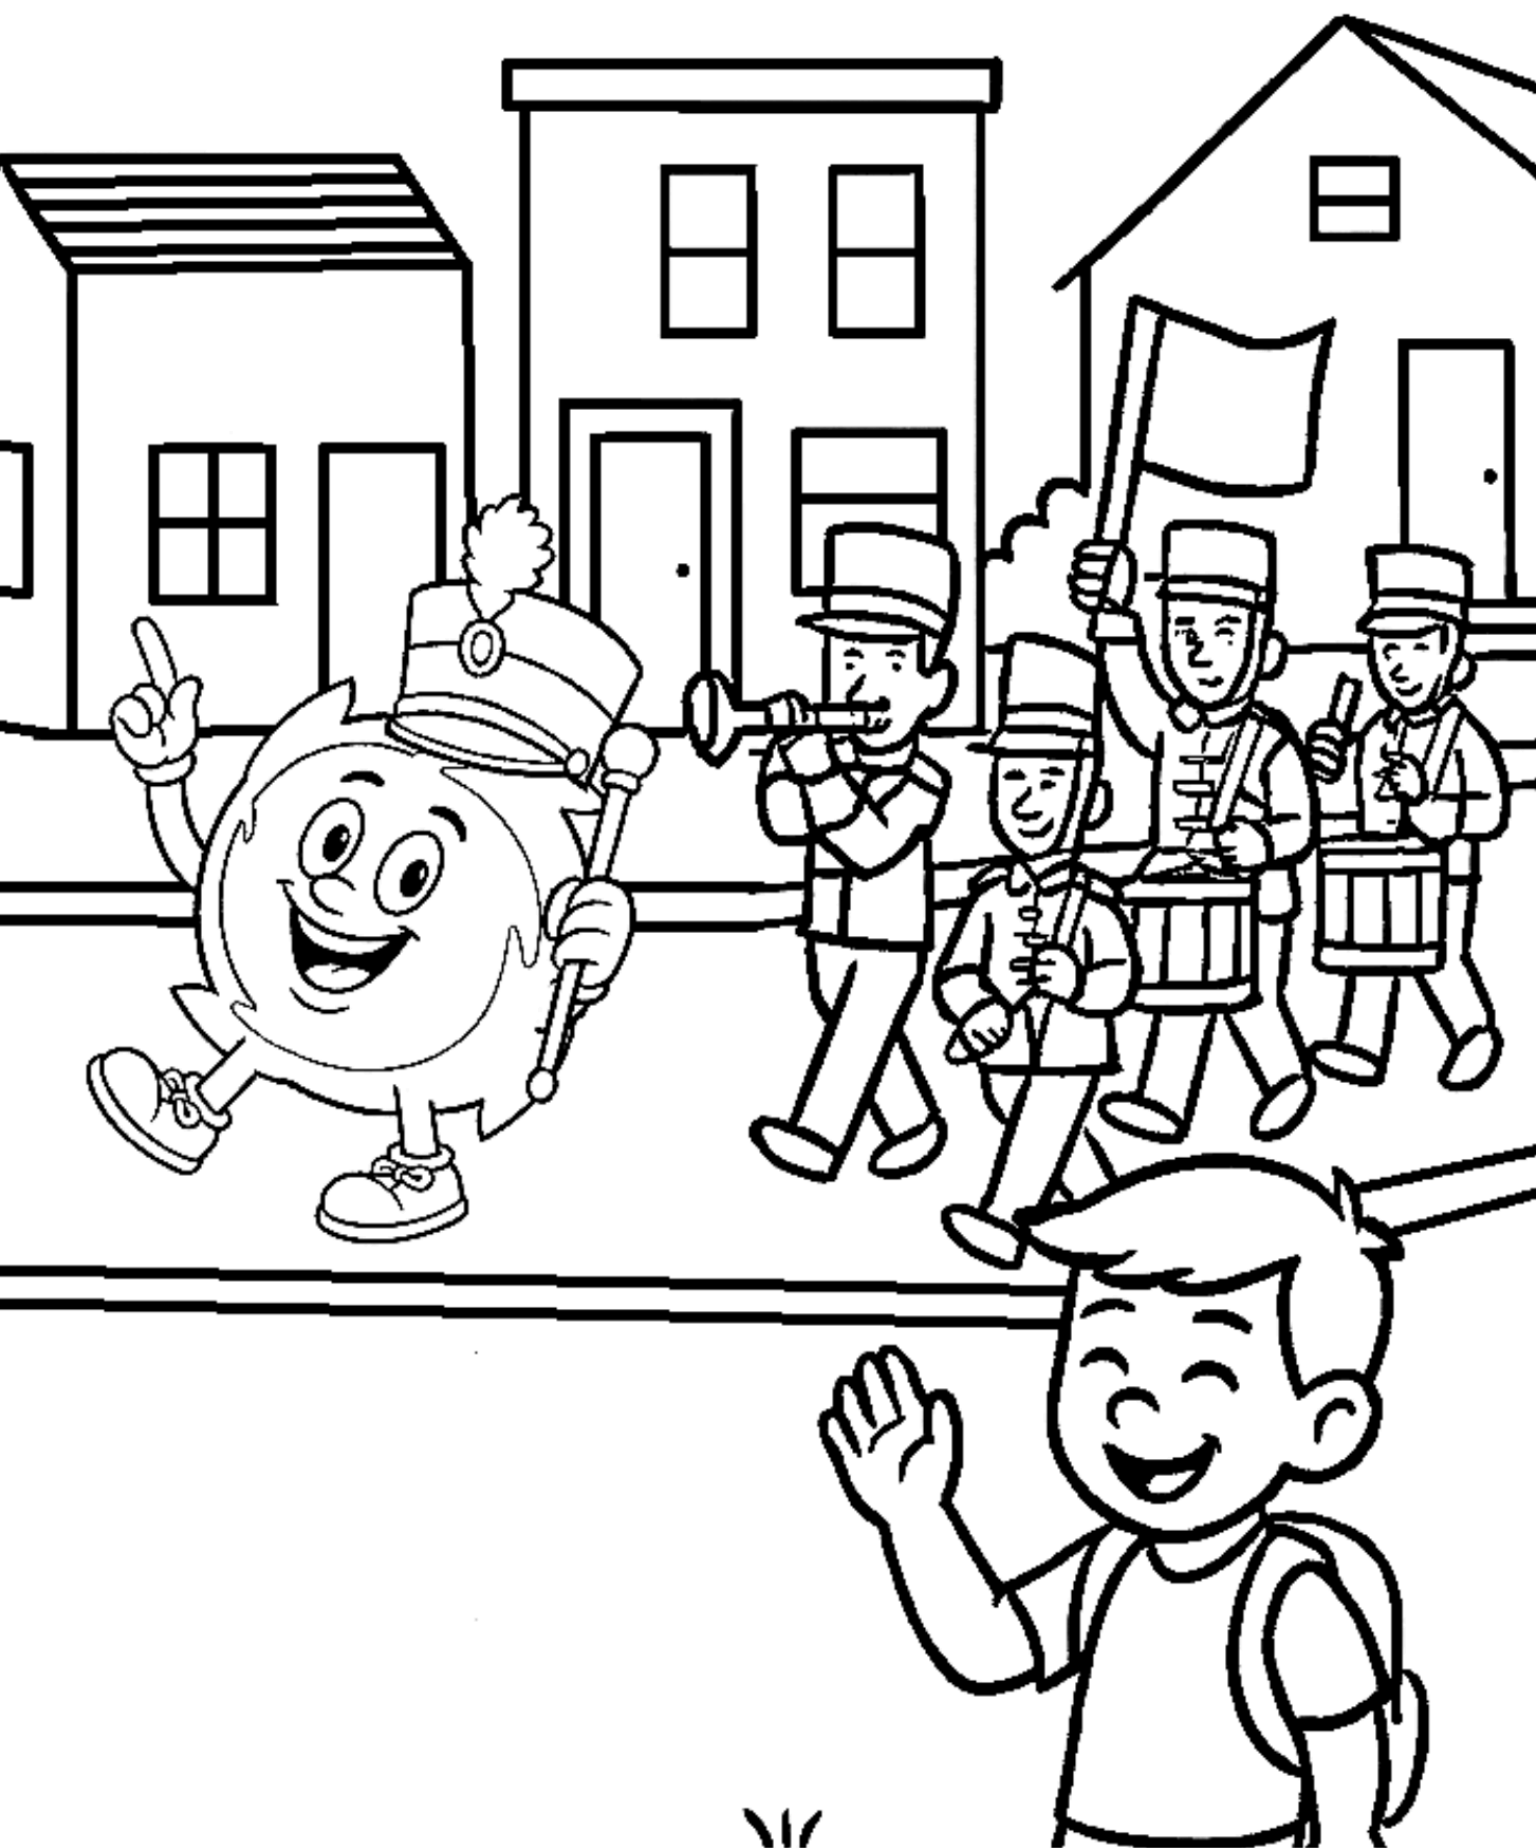

**Because we are locally owned, we care  
about our neighbors, just like you!**

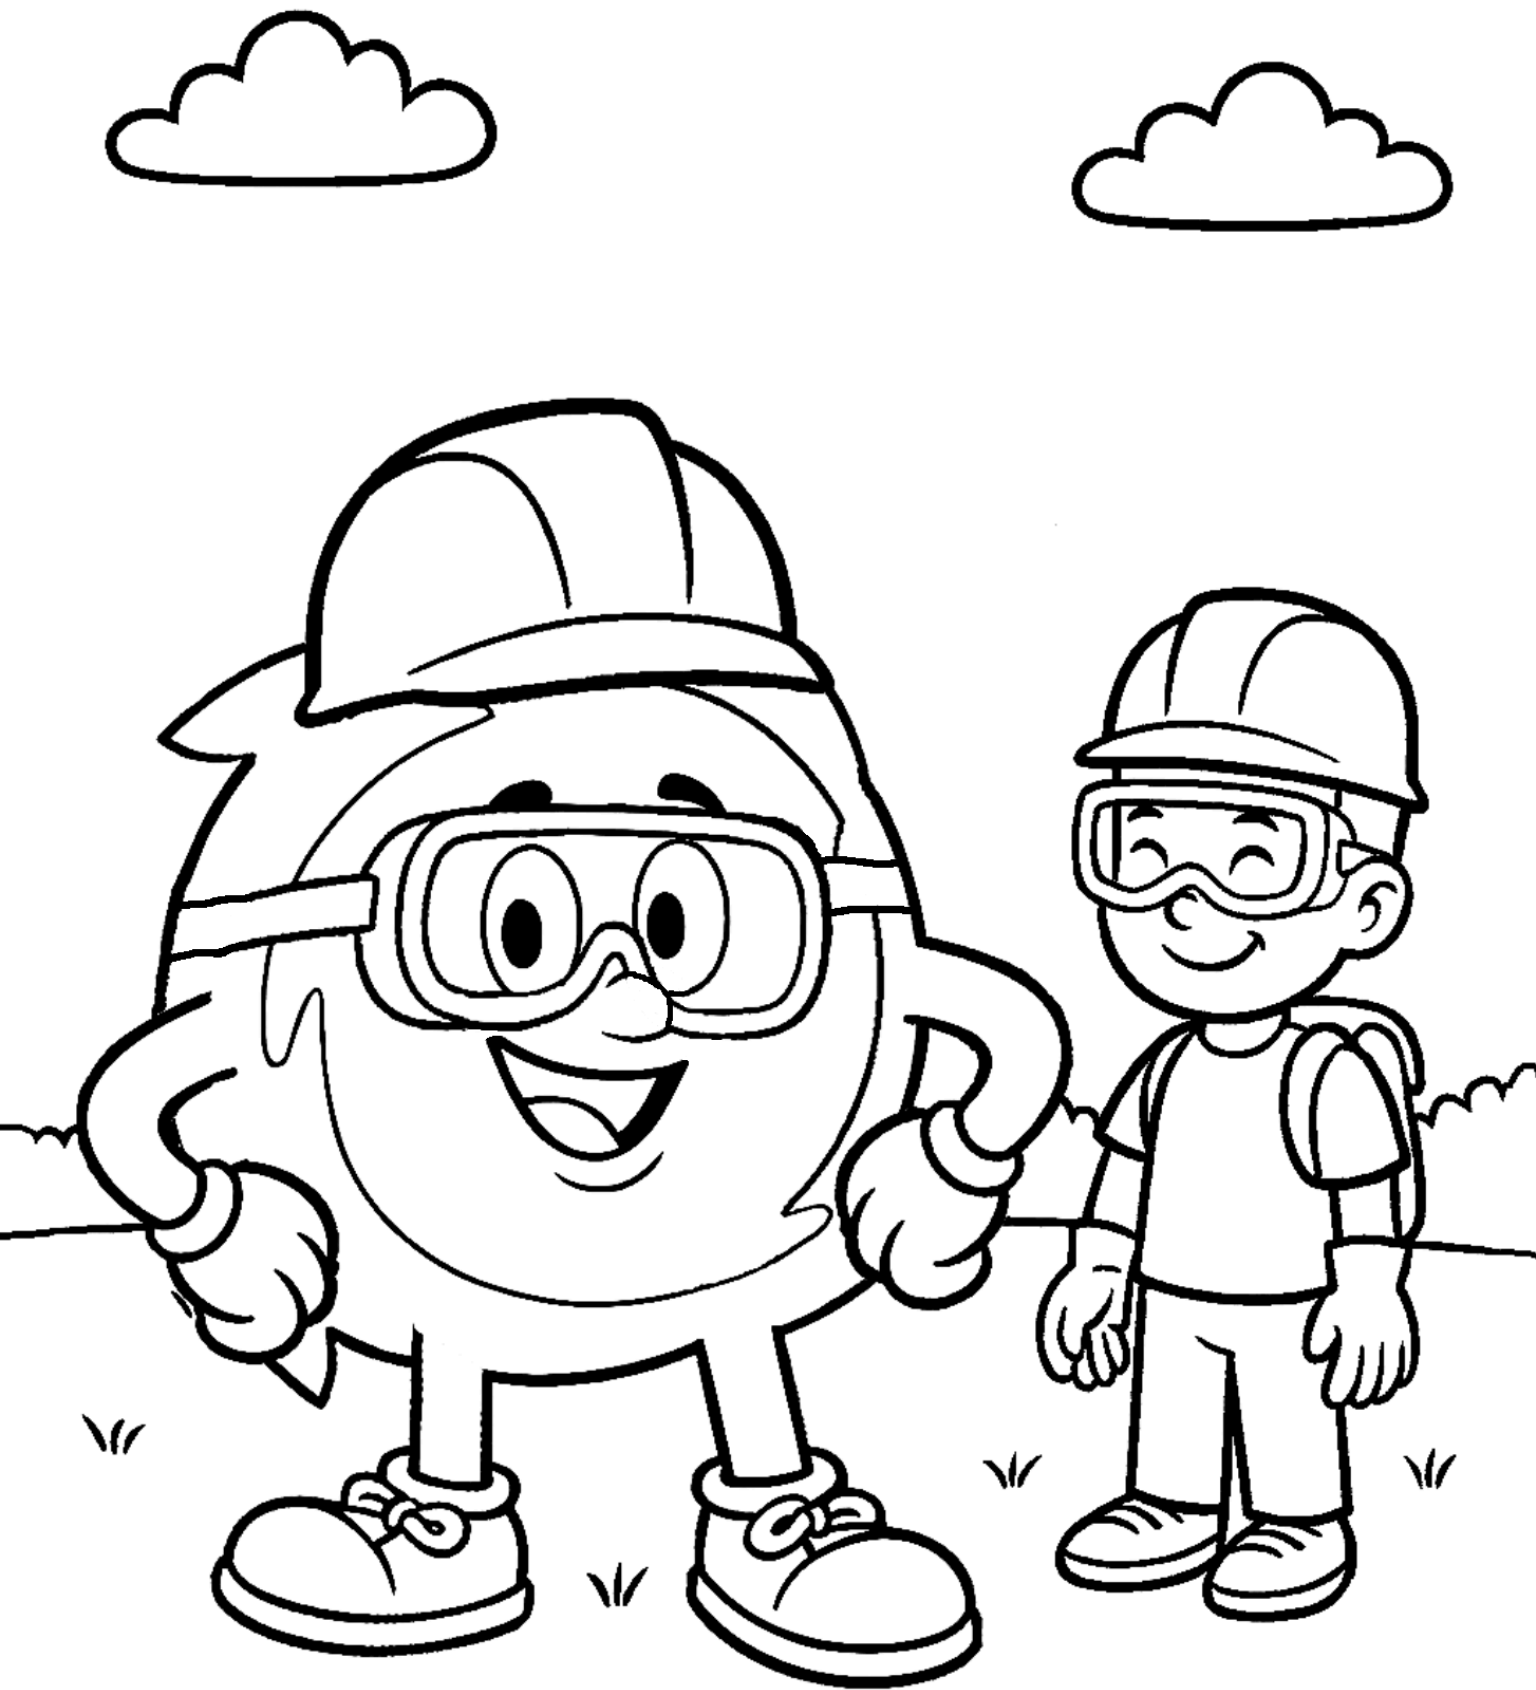

**We make the electricity needed for  
businesses to keep working.**

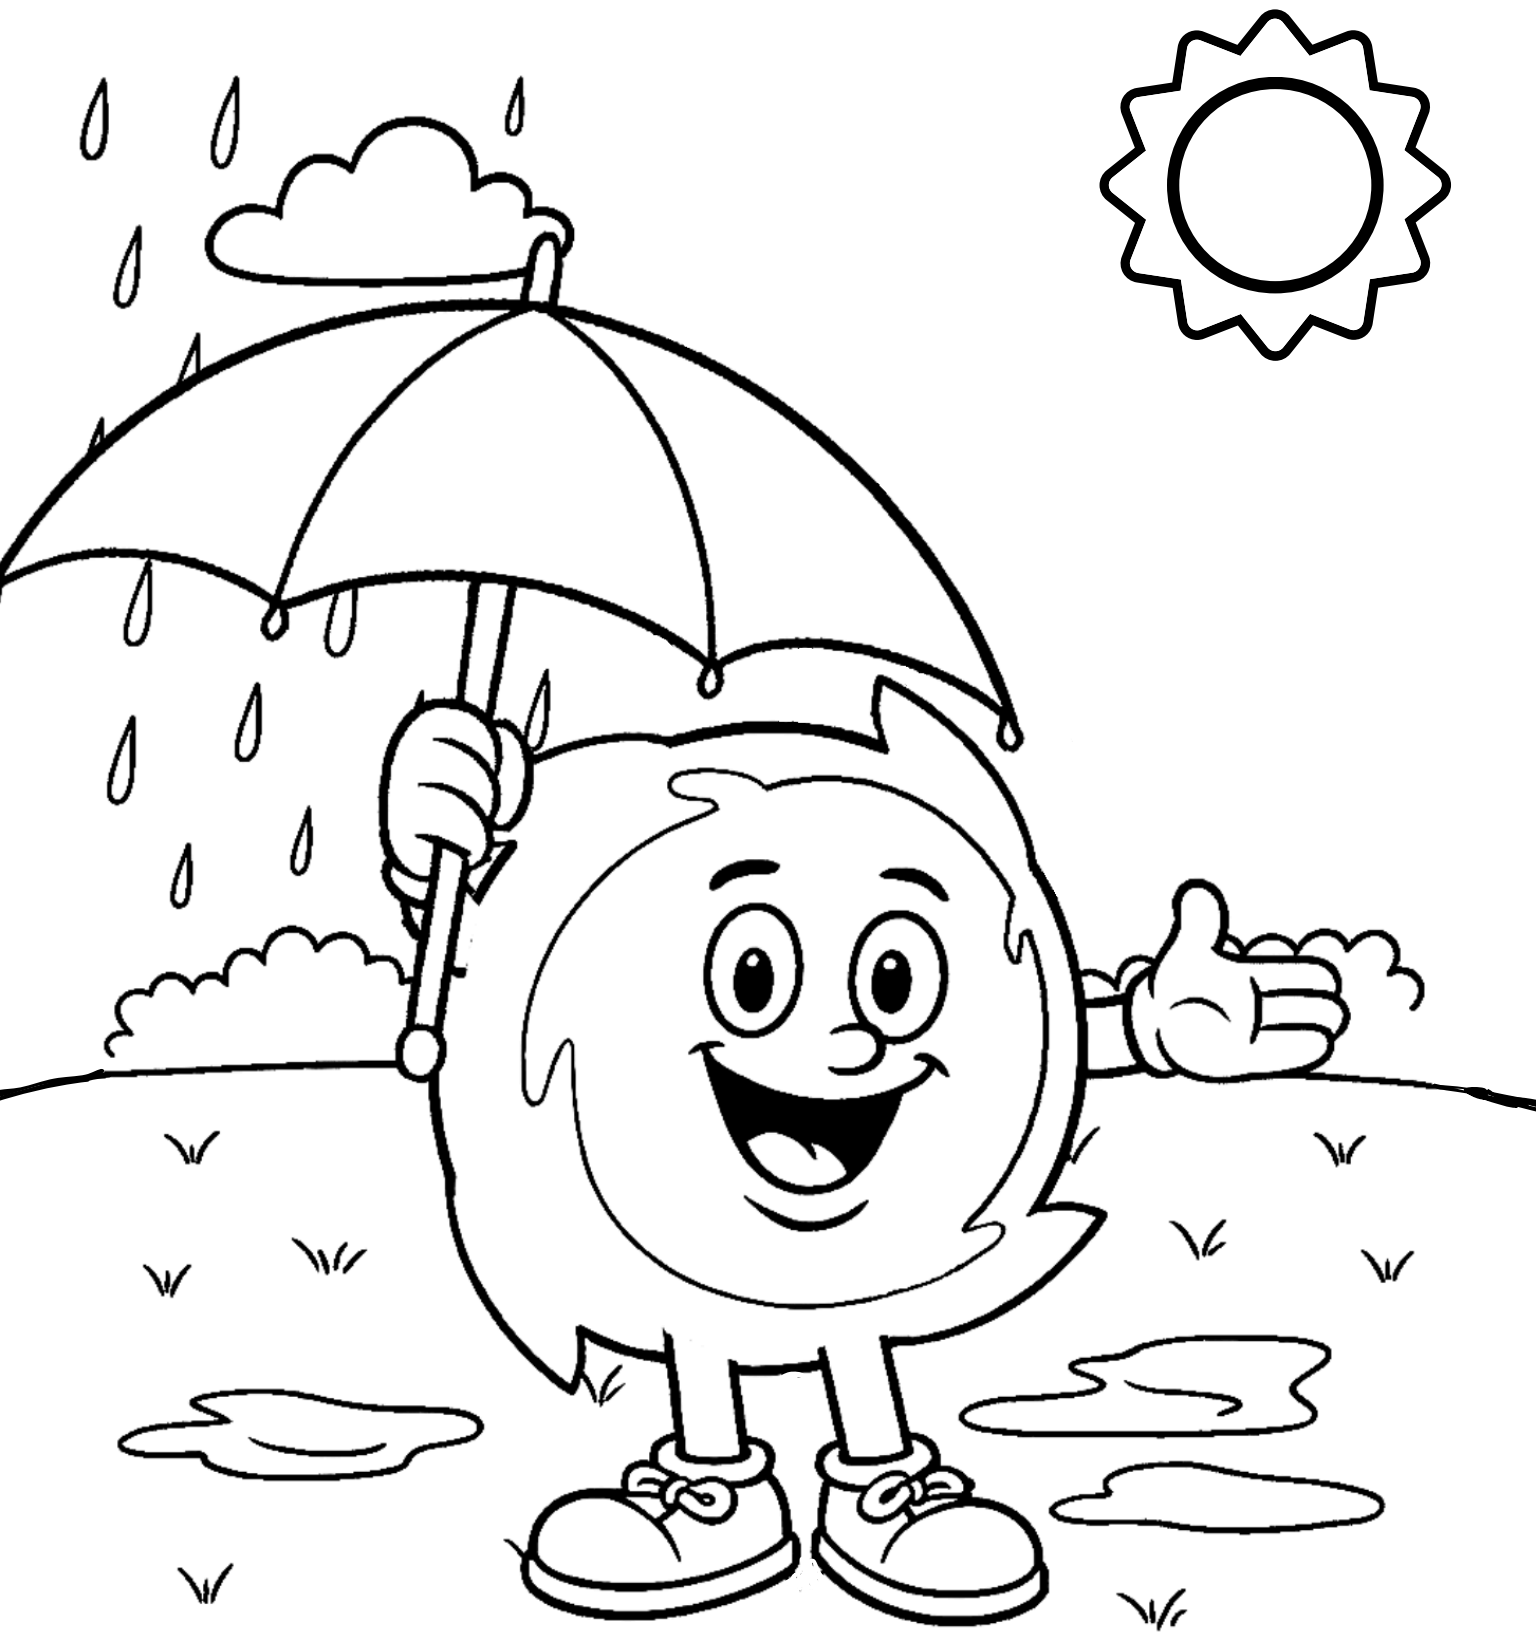

**We also help with community holiday lights, parades, decorations, and more.**

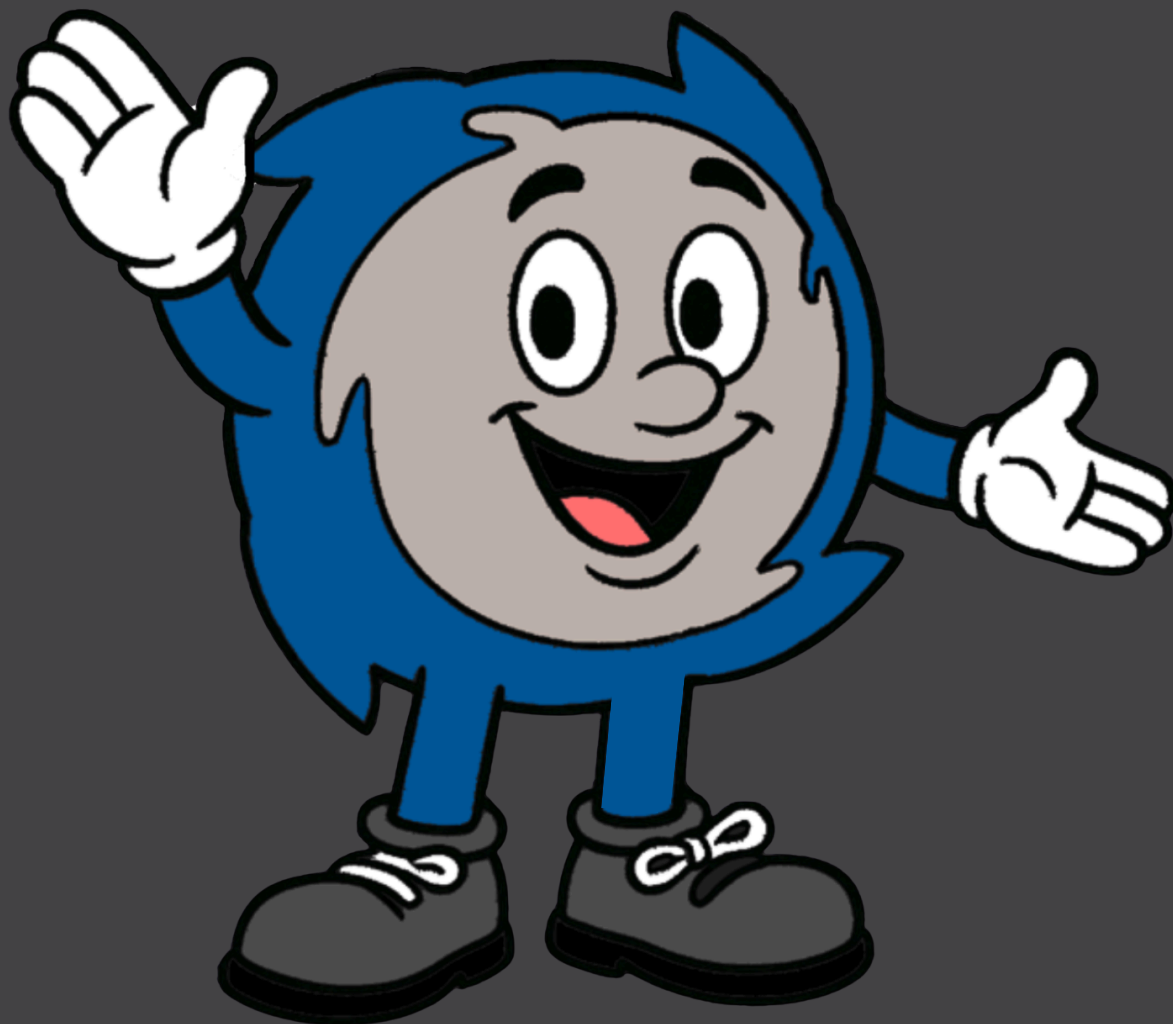

**We even teach kids like you how to stay  
safe around electricity!**

**Day or night, rain or shine,  
we are ready to help.**

**Public power means we all work together  
for our community. That is the power of  
public power!**

American Municipal Power, Inc. (AMP) is a nonprofit wholesale power and services provider for more than 130 public power communities, including yours! AMP manages and supplies competitively priced, reliable wholesale power to Member municipal electric systems, and offers a wide variety of services to help Member communities improve the quality of municipal utility services.
